

Kaspersky® Small Office Security

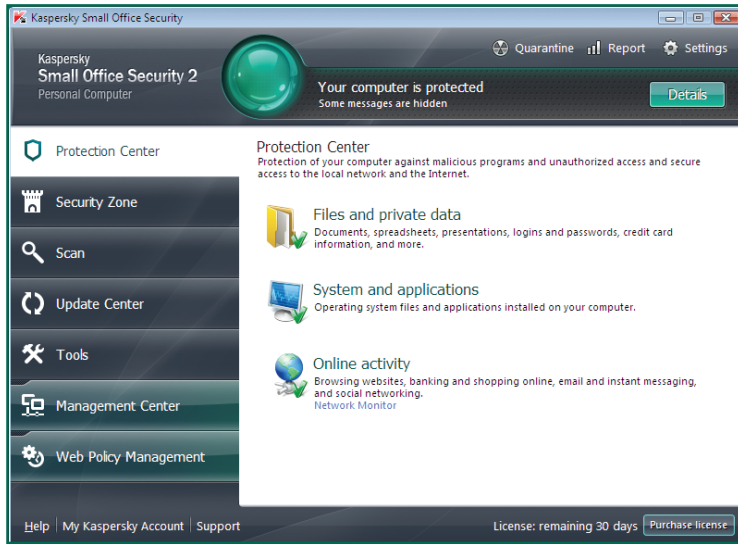

The Easiest Way to Protect Your Small Office

Kaspersky Small Office Security is the only product on the market specifically designed to meet the unique security requirements of your small office environment. With award-winning Internet threat protection, a host of protection tools for your digital assets, and a unique central management center, it delivers premium PC security that's incredibly easy to manage. With Kaspersky Small Office Security, you can stay focused on your business knowing your systems, data, and reputation are safe.

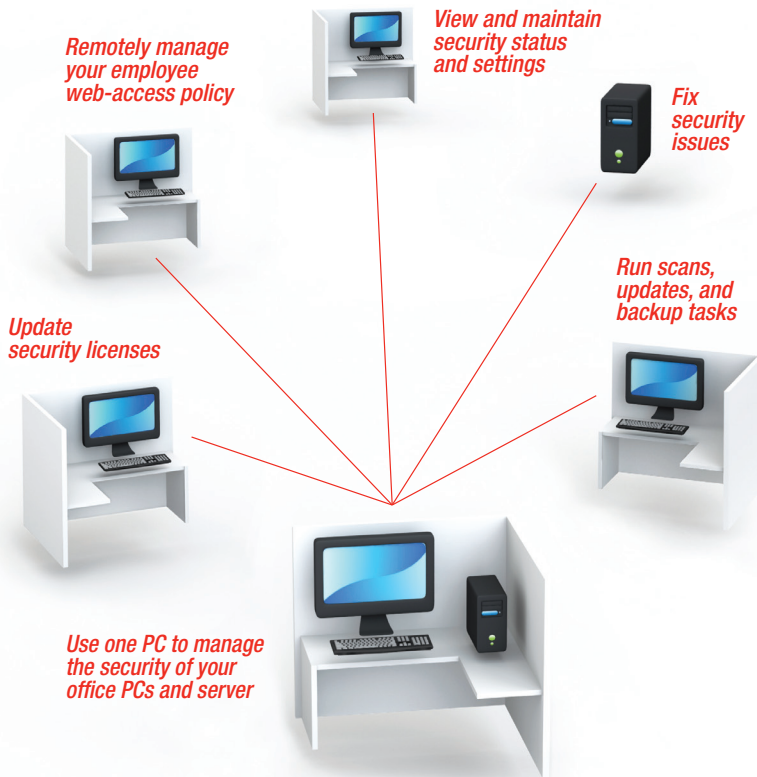

Here's What You Can Expect

- **Award-Winning Protection** – Be completely confident knowing that your business and data are safe from known and emerging Internet threats.
- **Easy, Central Management** – One PC manages the security of up to 10 PCs and a server: run scans, updates, and backup tasks; fix security issues; remotely manage your employees' access to the Internet; and update security licenses.
- **Employee Web-Access Management** – Remotely manage your employees' use of the Internet, limiting their access to PCs, websites, applications, games, social networking, and file downloads.
- **Scheduled, Automatic Backup** – Protect your business and customer data against theft, loss, and corruption by running automatic backup schedules for every PC and primary server in your office.
- **Encrypted File Vaults** – Protect your highly-sensitive data by easily creating password protected, encrypted file "vaults" that can be securely shared via email and USB drive.
- **PC Clean-Up Tools** – Keep your systems running smoothly and securely by deleting unnecessary temp and log files, registry entries, browser and application caches, and Recycle Bin.
- **Essential Server Security** – Centrally manage the security of your file server, print server, or any other application.
- **Maximizing Productivity** – Small, frequent updates and intelligent, behind-the-scenes scanning keep your systems running at maximum performance and help your employees stay focused and productive
- **Free Technical Support** – Free North American-based technical support is available via telephone, email, and online chat.

Everything You Need to Protect Your Business
